FULL STACK AI DEVELOPER

SUMMARY

Dynamic and results-driven Full Stack AI Developer with a strong foundation in machine learning, deep learning, and end-to-end web development. Skilled in designing and deploying intelligent, scalable, and data-driven applications that bridge the gap between AI research and real-world implementation. Proficient in Python, JavaScript, and modern frameworks such as TensorFlow, React, and Node.js, with hands-on experience integrating AI models into production-ready systems.

TECHNICAL SKILLS

Machine Learning	Python	React.js	HTML/CSS
Full-Stack Development	JavaScript	Node/Express.js	
Artificial Intelligence	TensorFlow	Firebase	

EDUCATION

Pursuing Post Graduation in Artificial Intelligence at Black Bucks.	Apr 2025 - Present
Pursuing a Post Graduate Program in Artificial Intelligence at Black Bucks, focusing on machine learning, deep learning, and real-world AI applications. Developing expertise in Python, neural networks, and AI/ML frameworks through hands-on projects and industry-relevant curriculum.	
Bachelor's Degree in Electronics and Communication Engineering	2020-2024
Bachelor's Degree in Electronics and Communication Engineering 7.4 CGPA, with a strong foundation in digital systems, signal processing, and communication technologies. Developed problem-solving and analytical skills through coursework and projects in embedded systems, IoT, and circuit design. I have pursued my Degree in NRI INSTITUTE OF TECHNOLOGY	
Intermediate (MPC)	2018-2020
College - Sri chaitanya institutions. Percentage - 81%	
SSC (X CLASS)	2018
SCHOOL - Sri chaitanya school	
Percentage - 95%	

PROJECTS

Dogbreedrecognition transfer learning
Developed a dog breed classification model using TensorFlow and MobileNetV2, achieving 96%+ accuracy across 70 breeds. Implemented transfer learning, data augmentation, and fine-tuning for optimized performance with an interactive prediction interface.
Helmet Detection using Unsupervised Clustering (PCA + K-Means)
Developedan unsupervised learning approach to classify helmetandno-helmet images using PCA for dimensionality reduction and K-Means clustering. Trained on a real-world Indian traffic dataset, the model automatically identified clusters corresponding to helmet and nonhelmet classes without labeled training. Achieved 50% clustering accuracy by aligning predicted clusters with true labels, demonstrating feasibility for real-time safety monitoringsystems.
SMS-Spam-DeepLearning
DevelopedanSMS spamdetection model using LSTM neural networks in TensorFlow, achieving 98% accuracy in classifying spam and ham messages. Implemented text preprocessing, tokenization, and sequence modeling for effective message classification.

Ghar Sansar – E-commerce Platform

Tech Stack: React.js, Next.js, Node.js, MongoDB, REST APIs

- Developed a scalable e-commerce website for home essentials and kitchenware with dynamic product listings and category-based navigation.
- Implemented secure checkout flow, responsive UI, and optimized performance for better user experience and conversions.

Alankar Furniture – Business Website

Tech Stack: React.js, Next.js, Tailwind CSS

- Designed a premium website for a furniture brand showcasing office and customized furniture solutions.
- Focused on modern UI/UX, responsive design, and lead generation features to enhance business visibility.

Sahni Tata Motors(Tata Platform) – Fleet & Logistics System

Tech Stack: React.js, Node.js, Express.js, MongoDB, WebSockets

- Developed a digital catalogue platform showcasing commercial vehicles, lubricants, and related products with structured categorization.
- Built scalable backend services and dynamic dashboards to manage product listings, specifications, and business insights efficiently.

Ethree – Corporate Website

Tech Stack: Next.js, React.js, CSS, SEO Optimization

Created a professional corporate website highlighting services and digital solutions, For ride bookings and

Implemented responsive layouts and SEO-friendly structure for improved brand presence.

Jain Silver Plaza – Jewelry (updates prices every second)

Tech Stack: React.js, Node.js, MongoDB, Payment Gateway Integration

- Developed an elegant online store for silver jewelry with advanced product filtering and gallery features.
- Integrated secure payment systems and optimized UI for premium customer experience.

Ethree POS Software – Retail Management System

Tech Stack: React.js, Node.js, MongoDB, Express.js

- Developed a POS system for billing, inventory, and sales management with role-based login access.
- Designed intuitive dashboards to streamline retail operations and improve efficiency.

Efour POS System – Business Operations Tool

Tech Stack: React.js, Node.js, MongoDB

- Implemented a web-based POS solution with billing, transaction tracking, and user management features.
- Ensured secure authentication and responsive performance for daily business usage.

NSMOSA – Alumni Management Platform

Tech Stack: React.js, Next.js, Node.js, MongoDB

- Built an alumni website with member registration, event updates, and networking features.
- Enabled profile management and engagement tools to strengthen community interaction.

StackVil Tracking Admin Dashboard

Tech Stack: React.js, Chart.js, Node.js, MongoDB

- Developed an admin panel for real-time vehicle tracking, analytics, and reporting.
- Focused on data visualization and centralized control for logistics management.

Hindusthan Security Jobs – Recruitment Portal

Tech Stack: React.js, Node.js, MongoDB

- Designed a job portal for security services hiring with candidate registration and job listings.
- Optimized workflows for employer-candidate interaction and scalable recruitment processes.

ADDITIONAL INFORMATION

Awards/Activities: Developed and deployed a full-stack website for Stackvil Technologies using modern web technologies and hosted it on Vercel for high performance and scalability. Built a dynamic website for BlueKey featuring an integrated AI-powered chatbot to enhance user interaction and support, showcasing expertise in full-stack development and intelligent system integration. Also developed app for laundry services, used to book service from home.
